## PRACTICE PROJECTS & RESPONSIBILITIES

### QA Practice Netlify-Web Applications

Manual Testing Project

- Designed and executed detailed test cases for authentication flows, form validations, and data-driven interactions.
- Identified and reported unique defects, including functional errors and UI inconsistencies.
- Validated API endpoints to ensure data integrity between front-end and back-end.
- Verified application responsiveness and behavior across different browsers (Chrome, Firefox, Edge).

### Test Automation-Web Applications

Practice Websites from Razvan Vancea's Demo Collection

- Developed and executed automated test scripts for web applications using Selenium/Python.
- Performed functional, regression, and UI testing on multiple demo websites.
- Implemented test automation frameworks and utilized assertions for validation.
- Generated automation test reports to analyze results and improve test coverage.
