PRACTICE PROJECTS & RESPONSIBILITIES

AI QuizWhiz (Collaborative)

Manual & Automation Testing Project

- Performed functional, UI, and validation testing for Login, Signup, Dashboard, and Cash Payments modules.
- Created and executed detailed test scenarios and test cases based on requirements.
- Identified, reproduced, and reported bugs to the development team.
- Developed basic automation scripts using Python & Selenium for regression testing.
- Conducted cross-browser testing across Chrome, Firefox, and Edge.

Test Automation-Web Applications

Practice Websites from Razvan Vancea's Demo Collection

- Developed and executed automated test scripts for web applications using Selenium/Python.
- Performed functional, regression, and UI testing on multiple demo websites.
- Implemented test automation frameworks and utilized assertions for validation.
- Generated automation test reports to analyze results and improve test coverage.

QA Practice Netlify-Web Applications

Manual Testing Project

- Designed and executed detailed test cases for authentication flows, form validations, and data-driven interactions.
- Identified and reported unique defects, including functional errors and UI inconsistencies.
- Validated API endpoints to ensure data integrity between front-end and back-end.
- Verified application responsiveness and behavior across different browsers (Chrome, Firefox, Edge).
